

“DIS-Code: Disconnected, discouraged, disenabled? Let’s code!”

**INVITATION TO THE PRESENTATION OF
THE DISCODE PROJECT IN CYPRUS
A MULTIPLIER EVENT Part II**

Dear Decision makers and teachers,

You are invited to participate in the DIS-Code: Disconnected, discouraged, disenabled? Let’s code! Multiplier Event – Part II, where you will have the opportunity to be informed about the projects objectives and the results so far.

When: 29 October 2018, 17:00- 20:00

Where: Hilton Hotel, Nicosia

Language of event: English (with some support in Greek)

What is the DIS-Code: Disconnected, discouraged, disenabled? Let’s code!: The objective of the project is to empower secondary school students (12-18 years old) with digital skills, mathematical competences, coding and transversal skills. The project aims to do so by training teachers to use innovative teaching methods such as gamification, project based learning and the flipped classroom method, a progressive teaching method where instructions are delivered online outside the class and home-works moved into the class.

Such innovative teaching methods are suitable for both involving more families into students' education and tackling with learning difficulties through a more personalized and tailored approach. Through these methods, students can focus on learning by doing, with the teacher guiding the way, being the lecture no longer the driver of concept mastery.

The event will include a presentation of the project’s objectives and its main intellectual outputs according to the attached agenda for Part II.

A dinner will follow after the presentation for which you, as a participant at the event, are cordially invited. **(30 places available, on priority of registration)**

Participants accepted will be notified by e-mail.

A certificate of participation will be given to all participants.

Press [HERE](#) to apply for Part II.

Deadline: 24 October 2018
